

# BUILDING TYPES ONLINE DATABASE

# THE INDISPENSABLE TOOL FOR TEACHING AND DESIGN

- **Large international collection of contemporary buildings: housing, schools, libraries, office buildings, museums, sacred buildings, hospitals and other building types**
- **More than 1000 case studies and more than 160 thematic articles on specific aspects of individual building types**
- **Based on Birkhäuser's high international standing in architecture books for academics and professionals and comprising a selection of Birkhäuser manuals, enhanced by additional analysis**
- **Comprises currently approx. 5,500 drawings and 2,200 photos**
- **The high-quality architectural drawings are mostly vector-based, drawn to scale and available for download**
- **Search options: Full text, architect, building types, decade, height, country, author, urban context and four additional search criteria that can be combined**
- **Browse options grant systematic access to all content according to Building Type, Urban Context and Morphological Type**
- **A detailed glossary of the typological terms used and more residential and school buildings will be added with the 2019 update**
- **The forthcoming 2019 update will comprise additional schools, museums, science and technology buildings as well as housing. Further annual updates will add new building types and more contemporary case studies**

*"... the careful selection by leading experts and their categorization of projects, together with the intuitive navigation and ease of downloading drawings will quickly transform this database into a first stop search for information about recent buildings."*

Janine Henri in *ARLIS/NA*, June 2016

*"The content of the articles does indeed seem authoritative across the different program types addressed... the case study projects reflect a commendably global scope of geographic distribution... The architects of the project buildings are also commendably diverse in terms of their stature within the profession."*

Terrance Goode in the *Journal of Architectural Education*, September 2017

Oliver Heckmann (Ed.)
